

# TURNER'S ROLLER DOORS LTD.

## REMOTE CONTROL ROLLER GARAGE DOORS

### REMOTE CONTROL ROLLER GARAGE DOORS

*The perfect blend of powered operation and convenience at the touch of a button.*

SAFE & SECURE

Our Garage Doors are made to measure, constructed from double and single skinned roll formed pre-stove enamelled finish in aluminium or steel (various colours and finishes available), with high abrasive resistance. The double skinned doors are then foam filled for added insulation and acoustic benefits.

SPACE SAVING

Manual or Automatic operated via hand held remote control unit, key pad or key switch.

EASY TO OPERATE

#### GARAGE DOOR BENEFITS:

- Smooth vertical opening.
- Low level override.
- Remote control option.
- Strong low maintenance doors.
- Space saving design.
- Available in a range of finishes to match existing decor.

Like our Security Shutters the Garage Doors also have no visible hinges or operating system and require very little maintenance, if any and will never need to be painted. Due to the way our garage doors are made, you get a snug fit around the entry therefore protecting against the elements.

This also means that potential intruders will be deterred.
